Professional Summary: Computer Science student at Florida State University with a background in software development, systems programming, and technical project collaboration. Experienced in C, C++, Java, Python, and Linux/UNIX, with hands-on project experience in file-system operations, process management, and object-oriented programming. Seeking an entry-level software engineering role to apply technical problem-solving skills and contribute to the development of reliable software solutions.

EDUCATION:

Florida State University — Tallahassee, FL **Graduation: Exp. May 2027**
Bachelor of Arts in Computer Science | Expected May 2027

Tallahassee State College — Tallahassee, FL **Graduation: June 2024**
Associate of Arts in Computer Science | June 2024

TECHNICAL SKILLS:

Languages: C, C++, Java, Python, MIPS, HTML
Systems & Tools: Linux/UNIX, GitHub, VS Code
Additional Tools: Excel, Logi, Jira, Godot
Technical Concepts: Object-Oriented Programming, Data Structures, Recursion, Process Management, File-System Operations, Error Handling

TECHNICAL PROJECTS:

Code Worlds (Current Group Project) | Godot, GDScript, Jira

- Collaborate with a software engineering team to develop a 2D educational game teaching programming concepts.
- Develop interactive learning activities using short-response, multiple-choice, and true/false questions.
- Use Jira to track tasks, coordinate responsibilities, and manage project milestones through an Agile-based workflow.

FAT32 File System Utility (Group Project) | C, Linux, Git/GitHub

- Collaborated on a user-space FAT32 file system utility supporting command-line navigation, file creation, reading, writing, and filesystem management.
- Implemented FAT32 image mounting and boot sector parsing, extracting filesystem metadata using packed structures, file pointers, and low-level I/O operations.
- Developed an open-file table and CLI commands (open(), close(), lsof, lseek(), read()) to manage file permissions, offsets, and FAT cluster-chain traversal; tested edge cases involving invalid access modes, duplicate opens, out-of-bounds offsets, and end-of-file handling.

Custom UNIX Shell (Group Project) | C, UNIX

- Collaborated with a development team to build a command-line UNIX shell supporting command parsing, process creation, and program execution.
- Independently implemented dynamic shell prompt generation and PATH-based executable lookup to support user interaction and command resolution.
- Utilized UNIX system interfaces (getcwd(), gethostname(), access()) and environment variables to retrieve system information and locate executable commands.
- Applied C pointers, string parsing, dynamic memory allocation, and memory deallocation to manage executable paths and system resources.

Binary Expression Tree Application | C++

- Implemented a binary expression tree using object-oriented programming and recursive algorithms.
- Developed functionality for expression construction, traversal, evaluation, and conversion.
- Created a Makefile to automate compilation and build management.

EXPERIENCE:

Florida Department of Health | Software Intern **July 2026–Present**

- Validate and geocode public health data using Microsoft Excel, Logi, and geocoding software to support FDOH Health CHARTS.
- Identify and correct inaccurate addresses, ZIP codes, duplicate records, and geographic inconsistencies to improve data quality and reliability.
- Troubleshoot unsuccessful geocoding results by reviewing address information, verifying geographic coordinates, and correcting location discrepancies.
- Review and update spreadsheets to maintain accurate, consistent data for public health reporting and analysis.

DSR Public Health Foundation / Consulting & Management LLC | Software Intern **June 2026–Present**

- Conducting research in support of FAMU's Medical Marijuana Education and Research Initiative (MMERI) CannabisRx Project.

SANAI ANDREWS

3377 Sawtooth Drive, Tallahassee FL 32303
Sbandrews474@gmail.com · (954)-448-2891 (mobile)

- Collaborating with Cloud Navigator to provide technical feedback on project data sources, system demonstrations, and related project components.
- Preparing weekly project reports summarizing progress, key developments, and updates for FAMU stakeholders.

LEADERSHIP/ORGANIZATIONS:

Alliance for Black Women, Florida State University | Participating Member and Volunteer **August 2024–December 2025**

- Represented the organization during FSU Market Wednesdays by staffing outreach and engagement events.
- Participated in mentorship, networking, leadership development, and academic support initiatives.
- Collaborated with peers and community members to promote professional growth and campus engagement.
